

Residential Level 2 Electric Vehicle (EV) Charger Incentive

A \$500 incentive is available for residential Salem Electric members who purchase and install a ChargePoint Home Flex electric vehicle charger from Salem Electric. Salem Electric is sold out of the NEMA 14-50 plug; however, NEMA 6-50 models are still available and can be plugged into a 240v outlet or installed as a hardwired unit. The charger retails for \$699 and will cost residential SE members \$199 after receiving the \$500 incentive.

Eligibility Requirements:

- The charger must be purchased from Salem Electric and be installed at a residential address that receives electric service from Salem Electric.
- Installation must take place within 60 days of the purchase date.
- Only one incentive per installation address.
- The member must provide the make(s) and model(s) of the electric vehicle associated with the service address.
- The charger must have access to Wi-Fi and the member must acknowledge that Salem Electric will have access to their ChargePoint charging data that will be used to help identify future EV initiatives.
- Installation must be in compliance with applicable local, county, and state code requirements.

Steps to purchase and receive a \$500 incentive:

- Submit this EV Charger Eligibility form and email to MemberServices@salemelectric.com or mail the completed form to Salem Electric, PO Box 5588, Salem, OR 97304.
- After the form has been received and your eligibility has been verified, Salem Electric will contact you to make arrangements for payment and delivery of the charger.
- Make a payment of \$699 to Salem Electric to purchase the charger.
- Receive a \$500 incentive once the charger is installed.
- The NEMA 6-50 model requires a 240v outlet. If you do not plan to connect your charger to an outlet you can remove the plug for hardwired installation.

Member Information:

Member Name: _____ Account Number: _____

Service Address: _____

Phone Number: _____ Email Address: _____

Vehicle Information:

Make of EV (Chevy, Tesla, etc.): _____

Model of EV (Bolt, Model 3, etc.): _____ Year of EV: _____
